

AMANDA DIANE EVALLO

Software Engineer

PROFILE

I am a Software Engineer with 5 years of experience and proven frontend and backend development especially in React JS and Node JS, creating and executing innovative software solutions to enhance business productivity.

EXPERIENCE

Software Engineer

- **Sesimi | Deployed Philippines Inc.**
Mar 2024 - Present

As a Software Developer at Sesimi, I implement new features and resolve bugs in the application. I write efficient, high-quality code, perform thorough unit and end-to-end (E2E) testing, and actively participate in team discussions to improve our development processes. I collaborate closely with Software Engineers at all levels, Design Engineers, and the Customer Success team. My work spans both Frontend development using React JS and Backend development with Node JS.

Design Engineer

- **Sesimi | Deployed Philippines Inc.**
Sept 2022 - Mar 2024

As a Designer Engineer at Sesimi, I create reusable components and versatile advertisement templates. I work closely with the Design Engineering team to implement robust and efficient strategies. My responsibilities include translating creative briefs into code using React JS and Tailwind CSS. Additionally, I contribute feedback and innovative ideas to enhance template development.

Advanced App Engineering Analyst

- **Accenture**
Apr 2021 - Jul 2022

As an Advanced App Engineering Analyst at Accenture, I develop innovative applications using various frontend tools and frameworks. I successfully created a proof-of-concept SFTP application and played a key role in building an Availability Web Application for a heavy equipment company. Additionally, I worked on multiple applications using Vue 3, collaborating closely with Japanese frontend and backend developers.

Frontend Developer

- **transcosomos Asia Philippines**
May 2019 - Apr 2021

As a Frontend Developer at Transcosmos Asia Philippines, I translated wireframes into precise HTML/CSS, ensuring pixel-perfect alignment with client designs. I also contributed to designing and developing a proprietary form component exclusively for Transcosmos developers.
