- JavaScript
- TypeScript
- GSAP
- Responsive Web Design

PROFILE

A Frontend Developer with almost 5 years of experience and proven frontend development especially in React JS, creating and executing innovative software solutions to enhance business productivity.

EXPERIENCE

Web / Frontend Designer

- **Sesimi | Deployed Philippines Inc.**
  Sept 2022 - Present

As a Web/Frontend Designer at Sesimi, I focus on creating appropriate, reusable components and versatile Advertisement Templates. I worked closely with the Design Engineering team to implement robust and efficient strategies. My responsibilities include translating creative briefs into code using React JS and Tailwind CSS. Additionally, I actively contribute feedback and suggestions to the Design Engineering team, introducing innovative ideas for enhancing template development.

Advanced App Engineering Analyst

- **Accenture**
  Apr 2021 - Jul 2022

As an Advanced App Engineering Analyst at Accenture, my role focuses on developing innovative applications. I've had the opportunity to be exposed to a variety of tools and frameworks relevant to frontend development. I successfully developed a proof-of-concept SFTP Application in one instance and played a crucial role in another project, where we constructed an Availability Web Application for a heavy equipment company. Furthermore, I participated in a project involving the development of multiple applications using Vue 3, closely working with both Japanese Frontend Developers and Backend Developers.

Frontend Developer

- **transcosomos Asia Philippines**
  May 2019 - Apr 2021

As Frontend Developer at transcosmos Asia Philippines, I was responsible for translating wireframes into HTML/CSS, ensuring meticulous alignment with the designs provided by our clients, down to the pixel. Moreover, I actively contributed to a project where we designed and developed a proprietary Form Component exclusively for Transcosmos developers.
